PLANTING SEASONS

EVERGREENS may be planted from the time the frost leaves the ground until the latter part of June, though early planting is much preferred. Some varieties of evergreens, however, can be moved more or less satisfactorily all during the summer months. August, September and October are also excellent months for moving evergreens.

Plant shrubs, trees, and fruit trees from the latter part of March till June, and in the fall from the middle of October until the ground freezes.

GENERAL DIRECTIONS FOR ORDERING AND OUR TERMS

In ordering, always give explicit directions as to address and desired time of delivery. Otherwise, we will use our best judgment and forward by most economical route. Practically all our deliveries will be made by our trucks. Delivery is free of charge within a 5-mile radius of our office—beyond 5 miles a small charge will be made for delivery, to cover cost, unless otherwise arranged for at time of sale.

GUARANTEE

It being impossible for us to control the after-care and weather conditions which may affect newly planted trees, Bulk's Nurseries agrees to resupply, at one-half the original price paid, any plants sold at the within published prices, that may die within one year from date of invoice, from causes other than abuse or neglect, making the following reservations:

1. The account to be paid within 30 days from date of invoice.
2. That in the event we shall not have in stock, at the time for replacement, plants like those originally supplied, or are prevented by strikes or other conditions beyond our control from making shipment of plants needed for replacement, then we are to apply the amount of credit to which the customer is entitled toward the purchase of other plants that he may at the time select and which we can supply.

We guarantee our stock to be true to name and will replace any that may prove otherwise or refund the purchase price. We guarantee our stock to be in good condition when shipped.

A Cordial Welcome Awaits You

TO ALL interested we extend a cordial invitation to visit our Nurseries and make a personal selection of trees and shrubs. The office and Nurseries are on the Merrick Road, one mile west of the village of Babylon, L. I.

During spring and fall our office and Nurseries are open to visitors on Sundays. Appointments, at your home, for any day in the week, including Sundays, will be made and kept.

LANDSCAPE SERVICE

WE consider it a pleasure to offer, without charge, suggestions in regard to planting problems to those who have time and do not wish to employ experienced help. Where special visits, plans, specifications, etc., are necessary, a moderate charge will be made for that service.

Landscape work attempted without the most careful consideration of all details is never satisfactory and usually entails large additional expenditures for omissions and revisions. For good results, one has to know what varieties of shrubs attain certain heights and which varieties do well in the shade, or which are suitable for sandy soil or seashore planting.

We have men who are technically trained in the designing and the execution of landscape problems, and have also the practical experience absolutely necessary in this kind of work. We have available at the proper seasons of the year, gardeners for general overhaul, summer and winter pruning, spraying, hedge-trimming, and winter mulching. Such work is important, if satisfactory results are to be secured, and should be entrusted only to thoroughly trained men.

A Group Planting of Evergreens

EVERGREENS

IN this group are contained some of the most valued plants for landscape effects. The diversity of color and habit of growth in this class provides truly "a plant for every place and purpose," some for limited areas of foundation plantings or for bed and border uses, others for screens, hedges, windbreaks, and for group and specimen plantings. They are always desirable for any landscape plantings for both summer and winter effects.

EVERGREEN SHRUBS

WITH few exceptions, no grounds, either small or extensive, should be without some representative of this rich and interesting group of plants. They endure shade and their rich blossom and foliage effect makes them almost indispensable. Certain varieties of this class, such as Rhododendrons, Azaleas, and Laurel ordinarily grow more satisfactorily and show to better advantage when planted in rather heavy masses. A deep, cool, moist subsoil, with proper drainage, is ideal.

The following list comprises the most popular varieties.

ORNAMENTAL AND SHADE TREES

IN addition to the trees which are valued for their shade, there are flowering trees which, at different times during the Spring and Summer, shower the lawn with their bloom. Do not forget that while shade trees add materially to the property value and landscape charm of your home, the initial cost is very small as compared with the enjoyment that you receive. The average shade tree is a long investment and returns your money manifold throughout the years of its usefulness.

FLOWERING SHRUBS

WHETHER planted individually or collectively, shrubs are an important feature in the adornment of any grounds. In groups they can be made to emphasize some feature of the lawn, to screen the garage, the laundry yard, or some unsightly view. Among borders of the lawn, along walks and drives and in corners, collections of shrubs may be gathered that will give a succession of bloom from early Spring until Fall. In the list that follows will be found shrubs for all such purposes.

California Privet Hedge

HEDGE PLANTS

HEDGE plants have their most practical value for marking boundaries and screening unsightly objects from view, but they become very ornamental as well if a little attention is given at the right time. California Privet is generally used for hedges, being a fast grower, very hardy, and adaptable to shearing.

Japanese Barberry is best used where the location is sandy or shady. Its red berries in the fall add to its value as an ornamental hedge plant.

BERBERIS THUNBERGI. Japanese Barberry

HARDY ROSES

R OSES—the mere name is an inspiration to garden-lovers. Nothing can take the place of the Rose. Almost every home has room for at least a few. Roses will grow in any fertile soil, but are much improved in bloom, fragrance, and beauty by rich soil, liberal fertilizing, and good cultivation. Branches should be well cut back early each Spring.

HARDY PERENNIALS

IT is no wonder that these old-fashioned hardy garden flowers continue to increase in popularity, for there is not a time during the whole flowering season when some hardy perennial is not in bloom, and when, during the late Summer, few shrubs are in blossom, these little plants may be depended upon for attractive display.

Plant perennials this year in the flower-bed where you have been using annuals. Every year you have to replace annuals, whereas the perennials come up each season with very little work or expense.

You do not need a large estate to have an old-fashioned garden or border from which you can pick flowers from early Spring until late Fall. Let us help plan your garden.

The size mentioned in the description indicates the height the plants may be expected to attain at maturity; the month represents the season of bloom.

Rock Gardens

We are prepared and equipped to undertake all kinds of rock garden construction. In addition to natural field stone we can supply Tuffa Rock, a beautiful and most interesting form of calcareous rock that is porous and ideally adapted to rock garden conditions.

We can supply a good assortment of the best varieties of rock plants. All forms of dwarf evergreens, shrubs, azaleas, rhododendrons, laurel, etc., suitable for the rockery are carried in our regular stock.

If you are interested in this most fascinating and interesting form of gardening, please do not hesitate to call on us for advice.

F R U I T S

IN the extremities of the lawn or upon the adjoining lot, plant fruit trees. They will bountifully reward you in the fruit they yield and which you will enjoy eating right from the trees or in winter as preserves and jam. The fruit-garden can easily be made a part of the scheme for beautifying your property. Flowers along the walk to the orchard will brighten the way and provide flowers for cutting.

The following is a limited selection of varieties that we know will do best on Long Island.

Apples

Early Varieties.

RED ASTRACHAN. Red. July, August.

YELLOW TRANSPARENT. Yellow. July, August.

Autumn Varieties.

FAMEUSE. Deep red skin.

McINTOSH. Red. November to February.

Winter Varieties.

BALDWIN. Red. January to April.

DELICIOUS. Yellow and red. November to January.

RHODE ISLAND GREENING. Greenish yellow. December to April.

CRAB-APPLE. Hyslop. Large; dark crimson. (Each)

5 to 6 ft., selected, 2 and 3 years old..... \$1.50

6 to 10 ft., selected, 4 to 6 years old....\$2.00 to 5.00

Cherries

EARLY RICHMOND. Sour. 5 to 6 ft. \$1.75 each.

McIntosh

Bartlett Pear

Pears

BARTLETT. Early.

CLAPP'S FAVORITE. Early.

KIEFFER. Late.

SECKEL. Late. (Each)

4 to 6 ft., selected, 2 and 3 years.	\$1.50
6 to 10 ft., selected, 4 to 6 years.	\$2.00 to 5.00

Peaches

BELLE OF GEORGIA. Early; white; freestone.

CRAWFORD LATE. Late; yellow; freestone.

ELBERTA. Early; yellow. A very popular freestone.

Any one of the above varieties: (Each)

3 to 4 ft.	\$.75
4 to 6 ft., extra strong.	1.25

Plums

Quinces

CHAMPION and ORANGE. (Each)

3 to 4 ft.	\$1.50
4 to 5 ft.	2.00

Plant a few fruit trees anyway. They are ornamental; and then no matter how plentiful fruit may be on the market, there's a flavor to one's own productions in the orchard and garden that just can't be found elsewhere.

Grapes

CATAWBA. Fine red Grape.

CONCORD. Blue; early; fine flavor. Most popular standard Grape grown today.

NIAGARA. The best standard white.

WORDEN. Black; large berries.	(Each)	(10)
Strong, 2-year-old plants.	\$.50	\$1.50
Strong, 3-year-old plants.	.75	7.00

Gooseberries

DOWNING. Green.

HOUGHTON. Red.

\$.35 each, \$3.00 for 10; extra-large, \$.60 each, \$5.00 for 10.

These two varieties are recognized as the standards.

Raspberries

EVERBEARING. They require very little attention and supply plenty of delicious berries.

\$.15 each, \$1.25 for 10; extra-strong, \$.25 each, \$2.00 for 10.

Blackberries

ELDORADO. One of the best early to midseason sorts.

\$.15 each, \$1.25 for 10; extra-strong, \$.25 each, \$2.00 for 10.

Rhubarb

LINNAEUS. \$.30 each, \$2.50 for 10.

SPRAYING OF FRUIT TREES

For best results we recommend three sprayings: First, during the winter; second, after the blossoms fall; and, third, about two weeks later. This will control the most prevalent insects and fungus diseases attacking fruit trees on Long Island.

We have men experienced in this kind of work, who are available at a moderate cost.
